Professional Summary

Data Science graduate with a CGPA of 7.65 and hands-on experience in Data Analytics, Business Analytics, Business Intelligence, and Machine Learning. Proficient in SQL, PostgreSQL, Python, Power BI, and Excel, with experience building analytics dashboards, recommendation systems, customer segmentation solutions, and KPI-driven reports. Skilled in transforming complex datasets into actionable insights to support data-driven decision-making and business growth

Technical Skills

Programming & Query Languages: Python, SQL, PostgreSQL

Data Analytics: Data Cleaning, Data Analysis, Exploratory Data Analysis (EDA), Data Management, Data Extraction

Visualization & BI Tools: Power BI, Tableau, Excel, Pivot Tables, XLOOKUP, Power Query, Charts

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Concepts: Business Analytics, Business Intelligence, Data Warehousing, Data Visualization, Data Modeling, Data Mining, Exploratory Data Analysis (EDA), RFM Analysis, Customer Segmentation, Dashboard Storytelling, Predictive Analytics, Statistical Analysis, KPI Reporting, SDLC, Agile Methodology, Scrum, User Acceptance Testing (UAT), Requirements Gathering, Business Process Analysis, Stakeholder Management

Tools: Streamlit, Git, GitHub, pgAdmin, Power BI Service, Jupyter Notebook

Projects

E-Commerce Customer Lifecycle & RFM Analytics Dashboard

Mar 2026

PostgreSQL, SQL, Power BI, DAX

GitHub

- Analyzed 5,000+ customer transaction records using PostgreSQL and Power BI to identify purchasing behavior and retention trends.
- Performed RFM segmentation using SQL techniques including CTEs, Window Functions, NTILE(), Joins, and Views.
- Classified customers into Champions, Loyal Customers, Potential Loyalists, and At-Risk groups for targeted retention strategies.
- Developed interactive Power BI dashboards with 15+ KPIs covering revenue trends, churn analysis, customer lifetime value, and segmentation insights.
- Created 10+ DAX measures and PostgreSQL views to automate KPI tracking and business performance reporting.

Netflix Data Analysis System

Feb – Mar 2026

Python, SQL, Machine Learning, Streamlit

GitHub

- Processed and analyzed 8,800+ Netflix titles using Python, SQL, and exploratory data analysis techniques.
- Developed an interactive Streamlit application featuring content exploration, trend analysis, and recommendation capabilities.
- Built a recommendation engine using TF-IDF and Cosine Similarity to generate personalized content suggestions across multiple genres.
- Implemented a Random Forest model for content popularity prediction using genre, release year, duration, and ratings data.
- Designed analytical dashboards visualizing genre distribution, ratings analysis, release trends, and audience engagement patterns.

Education

Sheth N.K.T.T College of Science and Arts

2023 – 2026

Bachelor of Science in Data Science — CGPA: **7.65**

Mumbai, Maharashtra

Certifications

- SQL for Data Analysis – Udemy
- Power BI Certification – Simplilearn
- Deloitte Data Analytics Job Simulation
- Tata GenAI Powered Data Analytics Job Simulation – Forage

Additional Information

- Strong understanding of Data Analytics, Business Analytics, Business Intelligence, and translating data into actionable business insights.
- Familiar with SDLC, Agile, Scrum, UAT, stakeholder communication, and business process analysis.
- Experience developing dashboards, KPI reporting frameworks, customer segmentation solutions, and predictive analytics models.
- Proficient in GitHub, version control, and collaborative project development with a focus on continuous learning and problem-solving.
